The enormous quantities of scoria cast aside daily from the blast furnaces of the iron-works of the South Wales coal-field are, it appears, about to be turned to good account by the ingenuity of Dr. Smith, of Philadelphia. This gentleman, with a staff of assistant cliennests, has for some time been staying at Merthyr with a new of experimenting upon the blast furnace accora, with the object of producing therefrom a rarsety of articles in daily use, such as square tiles, paving hags, bottles, and utensits of domestic ase. In converting the furnace cinder, Dr. Smith has been very successful. The bottles thus made are much tougher and the annealment is more perfect than in the common glass often, the such as square tiles, paving hags, bottles, and utensits of domestic ase of the such that it is more perfect than in the common glass often, for the value of the such that it is more perfect than in the common glass often, for the value of the value
